

I support the full withdrawal of all segregation areas on the plateau around Grand Canyon National Park from uranium mining, for at least 20 years

Leave it in the ground!

Keep our rivers free and clean. No more dirty energy. No more weapons! NOW

I support protecting from mining the one million acres of public lands surrounding Grand Canyon National Park as identified in Alternative B of the Draft Environmental Impact Statement. I also support protecting these lands for 20 years, which is the maximum allowed administratively.

The last time uranium was mined near Grand Canyon it was a long-term public health disaster. The long term objectives of Grand Canyon National Park should not be sacrificed to short-term expediency. Drifter Smith

Grand Canyon National Park is a national treasure, and the species in and around the Park should be protected from the impacts of uranium mining. Sue Ordway

TO BLM:

I would like to submit my comments on the DEIS on the proposed uranium mine in the Grand Canyon Area. The issues that have surfaced in light of the tragedy in Japan, I would like to please ask you to support Alternative B, which includes the full with drawal of one million Acres and full protection of the Grand Canyon.

Thank you,
Sincerely,

John Pamperin
